

Redi Rig

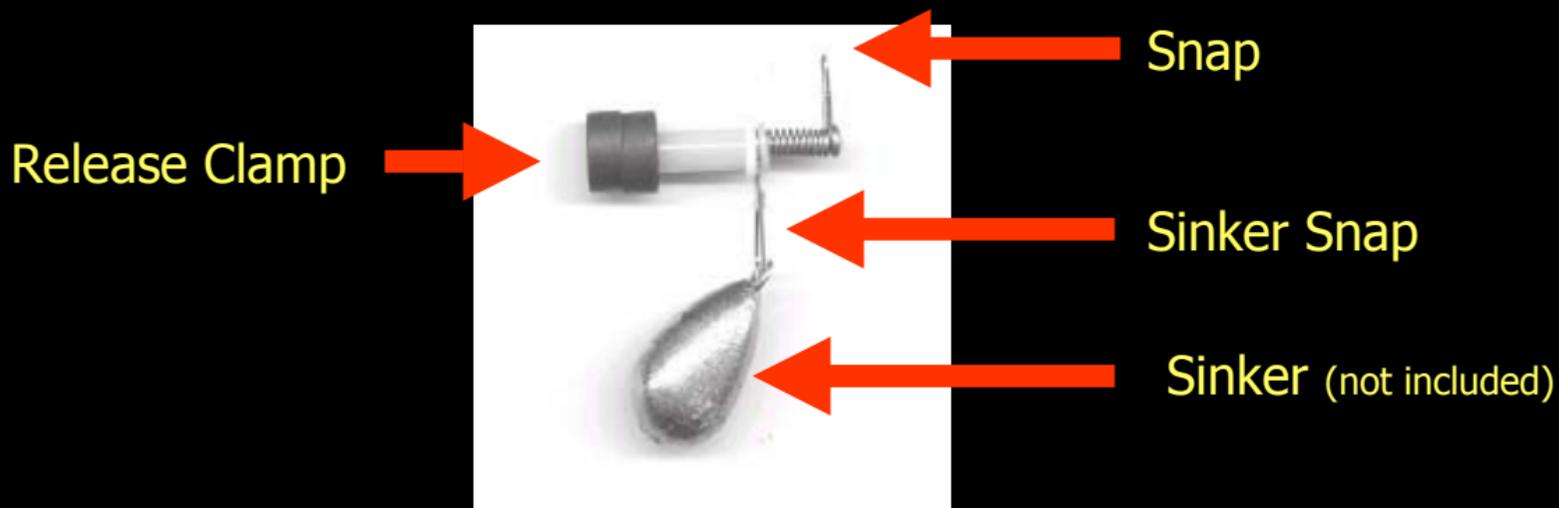

INLINE RELEASER

[The Design](#)

[Attaching The Releaser](#)

[Drifting/Trolling Open Water](#)

[Next](#)

[Back](#)

Releser Components:

The snap at the end lets the unit slide on the line after being released

The snap closer to the body is for adding sinkers or devices

The rubber release clamp grips line and releases after the hook set

TO ROD

1. Insert line in snap

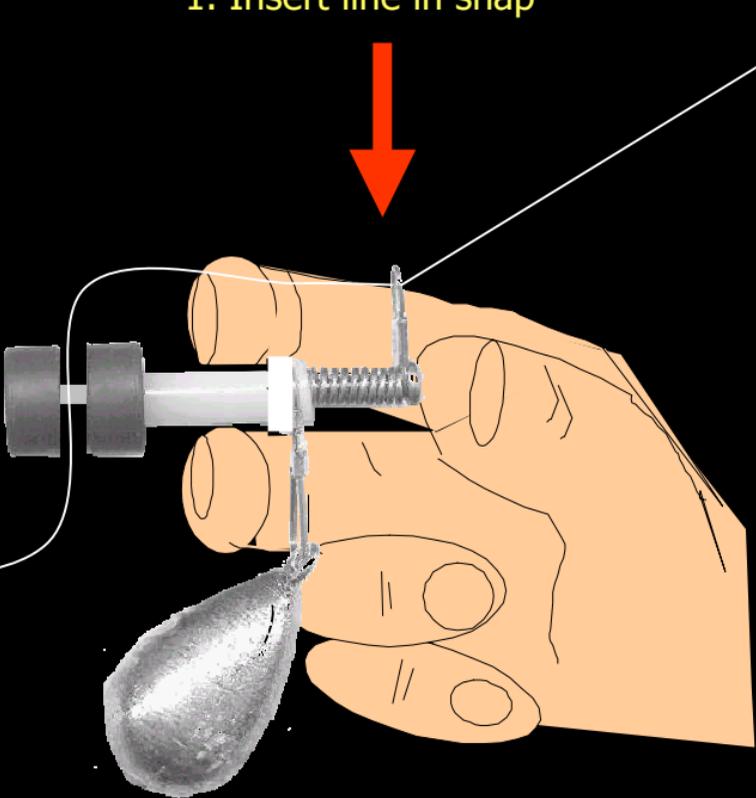

2. Push down as shown
And insert line across clamp
face

Note: The closer the line to the center
shaft the tighter the release

TO LURE/BAIT

Add a 4-6ft leader with swivel and
bead above bait to stop releaser
from slamming lure

[Next](#)

[Back](#)

- Let out 20ft of line
- Attach Releaser
- Let out more line to sink line and increase bait depth
- Set more than one rod with different size sinkers..Once fish is caught switch other rods to that size sinker
