

RUB RAIL

Replacement Selection Guide

This guide cross-references the original factory rub rail used by over 80 of the leading boat manufacturers since 1993.

To find the rub rail you need, follow these easy steps:

- 1) Look up the make of boat
- 2) Match the rub rail and insert (*best if you have a sample*)
- 3) Choose the preferred color
- 4) Call a distributor or retailer to order

All TACO colors are UV stabilized to withstand the sun and sea. TACO's wide variety of colors allows you to accent traditional rub rails to fit your style.

**TACO makes choosing a
rub rail in the color
you want fast and easy.**

RUB RAIL KITS

KITS

Easy to Install and available in most stores

Kit includes:

Vinyl Rub Rail, Insert (if needed),
End Caps, Screws, Installation Guide,
& Installation DVD (mail-in card)

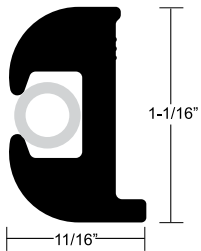

- Flexible vinyl and semi rigid rub rail kits
- Everything needed in one convenient box
- New easy-carry box
- Grip-and-view packaging for a hands-on look at rub rail

Original and Compatible

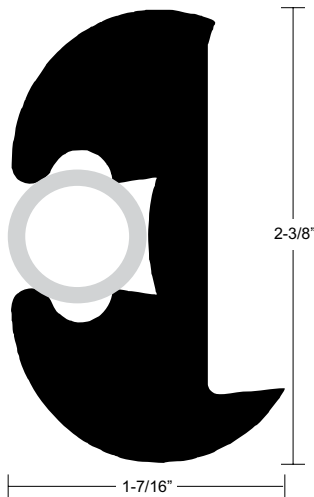

TACO supplies the original rub rail to most of the builders listed in this guide. Compatible rub rails are provided for those boats where the builder has more than one supplier or uses a competitor's product. In most cases, the product is virtually identical and interchangeable for all practical purposes.

PART #	HEIGHT	WIDTH	RR COLOR	INSERT COLOR	LENGTH

BEFORE YOU BEGIN

BEFORE

- Ensure the length of the rub rail is sufficient for your boat. It is always best to buy an extra 10' for trial and error.
- Make sure to purchase all the materials needed (rub rail, insert, fasteners, end caps, splice caps, etc...) to complete the job.
- Carefully read all the instructions before beginning and/or watch the TACO Rub Rail Installation Video.

ESTIMATING RUB RAIL LENGTH

1. Take the length and width (beam) of your boat
2. Add them together and multiply by two
3. The total will give you the minimum length of rub rail required for your boat in feet

RUB RAIL SELECTION TIPS

You can replace your rub rail with a factory replacement style or a completely different look. Regardless of the material originally installed by the builder of your boat, feel free to choose the material and style you desire.

It is easier to install if you remember to choose a rub rail that is at least the same height as the original.

Flexible vinyl rub rail is the easiest to bend and provides a cushioning effect when in use against normal bumps from pilings and docks.

Rigid vinyl, as well as aluminum rub rail with flexible vinyl insert, performs well, lasts long and is easy to install in straight runs.

Rigid vinyl rub rail with stainless steel overlap provides the best protection and the longest useful life.

TOOLS & SUPPLIES NEEDED

- TACO rub rail, insert
- Measuring tape
- Safety goggles
- Two cordless drills (one for a screw driver bit and one for a drill bit)
- Putty knife or scraper
- Caulking gun with silicone sealant or a tube of 3M 5200
- Metal file
- Heat gun (for rigid vinyl rub rail and flexible inserts)
- Garden shears (for cutting flexible vinyl rub rail and inserts) or hacksaw/power saw & cutoff wheel (for cutting stainless steel overlaps)
- Miter box (for metal and rigid vinyl rub rail)
- Rubber mallet
- TACO Rub Rail Installation Video
- Fasteners

BEFORE

TACO Metals and Marine Is Your Choice Because:

- Experience •

We build over 30 years of experience into our products
We are the #1 Rub Rail brand preferred by Boat Builders
We provide the broadest range of Rub Rail solutions

- Service •

You Talk, We Listen...
Our sales team and customer service organization are knowledgeable and responsive & we treat you like family

- Quality Assurance •

We provide the only 5-year warranty in the industry!
We protect your investment with UV coating, color stabilizers and impact modifiers that ensure our Rub Rails hold up to sun and saltwater, protecting your boat against damage

- TACO's Commitment •

Is to "Total Customer Support"
We offer training videos, installation tips and a selection of other helpful information on our website: www.TACOMarine.com
